Infotonics Technology Center

Infotonics is a *collaborative, industry led* microsystems Center of Excellence for applied research & development and commercialization of photonics and microsystems. The Center accelerates the transition from basic and applied research to commercialization of next-generation optical communication networks, advanced imaging and information systems, microfluidic delivery systems, assembly and packaging technologies, and prototype and pilot-scale fabrication. The goal is to reduce the financial risk frequently associated with the development process and to increase the probability of commercial success.
